

:30 commercial-WHAT WE DO BETTER

(On screen: We are a true partner.) At Galactic we really care about our partners and clients. Our mission to help protect a million people is more than just running some tools in a network or performing pen tests. We care what is right for the people who depend on us, and because we care, we go above and beyond to find the holes in their networks before the hackers do. Then we make them secure. We celebrate our partners wins like they're our own. We rave about them in our meetings. We are constantly working to make our partners stronger and make their jobs easier. We care about their success because ultimately, their success is our success. Let's go!
